Policy No. 2121
Instruction

SUBSTANCE ABUSE PROGRAM

The board recognizes that the abuse of alcohol, and the use and abuse of controlled illegal, addictive, or harmful substances including marijuana (cannabis) and anabolic steroids is a societal problem and may represent an impairment to the normal development, well-being, and academic performance of students. To ensure the safety, health, and well-being of all students, the board is committed to the development of a program which emphasizes drug and alcohol abuse prevention, intervention, aftercare support, and necessary corrective actions. The program will address the legal, social, and health consequences of drug and alcohol use, and provide information about effective techniques for resisting peer pressure to use illicit drugs or alcohol. The program will be age-appropriate and developmentally based for all grades.

The board recognizes the effects on the school, home, and community resulting from the abuse of alcohol and the use and abuse of controlled illegal, addictive, or harmful substances including anabolic steroids. While the primary obligation to seek assistance rests with the student and his/her parent(s)/guardian(s), school staff will work with the home and community to develop and implement a comprehensive prevention and intervention program.

To keep students, families, and community members informed about drug abuse issues, the district will make information from the Department of Health or other organizations that addresses substance use trends, overdose symptoms, and response, and the secure storage of prescription drugs and over-the-counter medications available in accordance with Policy 4001 (Public Information Program).

The superintendent or designee is directed to develop and implement procedures to assess the scope of the problem of the use of addictive substances such as alcohol, drugs, and nicotine, and to reduce and/or eliminate the problems associated with the use of alcohol, drugs, and nicotine.
