Policy: 2151

Section: 2000 - Instruction

Interscholastic Activities

The board recognizes the value of a program of interscholastic activities as an integral part of the total school experience to all students of the district and to the community. The program of interscholastic activities will include all activities relating to competitive sport contests, games or events, or exhibitions involving individual students or teams of students of this district when such events occur between separate schools within this district or with any schools outside this district.

The board expects that:

- A. All interscholastic activities and events will be in compliance with the rules and regulations of the Washington Interscholastic Activities Association (WIAA). The schools of the district will not participate in any out-of-season athletics that are not sanctioned by the WIAA. The district will not be responsible or liable for non-school-sponsored programs or for programs that are organized, promoted or participated in by staff members without school approval. The district will not be responsible for or control and incur liability for summer and/or out-of-season activities unless specifically sponsored by the school district. The superintendent will establish rules defining the circumstances under which school facilities may be used and under which announcements of summer sports leagues and/or clinics may be channeled to students.
- B. An athletic coach must be properly trained and qualified for an assignment as described in the coach's job description.
- C. A syllabus that outlines the skills, techniques and safety measures associated with a coaching assignment will be distributed to each coach. A coach must secure permission in advance if he/she wishes to deviate from the syllabus.
- D. Coaching stipends will be approved by the board of directors.
- E. All gifts to a coach exceeding a combined total of five hundred dollars (\$500.00) in a season will be reported to the athletic director for approval by the board of directors.
- F. In-service training opportunities will be afforded to each coach so that they are trained to attend to the healthcare needs of participants. Prior to a sports season, the coach will prepare a plan for handling medical emergencies at practice sessions and games (home and away).
- G. Participants will be issued equipment that has been properly maintained and fitted.
- H. All facilities and equipment utilized in the interscholastic activity program, whether or not the property of the district, will be inspected on a regular basis.

- I. Nonprescribed medications and supplements must be approved by the superintendent before they may be available for use by coaches and/or athletic trainers. After athletic training medications have been approved, the coach and/or trainer must secure authorization from the parent and the student's doctor before the medications may be used during the athletic season. If such release is not on file, the nonprescribed medications may not be used. This provision does not preclude the coach and/or trainer from using approved first aid items.
- J. The board recognizes that certain risks are associated with participation in interscholastic sports. While the district will strive to prevent injuries and accidents to students, each participant and his/her parent(s) or guardian(s) will be required to sign a statement which indicates that the parent(s) and the student acknowledge the risks of injuries resulting from such participation and give assurance that the student will follow the instructions of the coach.
- K. Each participant will be required to furnish evidence of physical fitness prior to becoming a member of an interscholastic team. A written report will be completed when a student is injured while participating in a school-supervised activity. A participant will be free of injury and will have fully recovered from illness before participating in any activity.
- L. Each student participating in interscholastic athletic activities is required to have or obtain medical insurance for expenses incurred as a result of injuries sustained while participating in the extracurricular activity. Students will provide evidence of adequate insurance coverage for medical expenses or will obtain such coverage through the insurance plan offered to all students participating in activities in the district. No student will be denied the ability to participate solely because the student's family is unable to pay the entire amount of the premium for such insurance. The superintendent or his or her designee may approve partial or full waiver of premiums to permit all students to obtain the required medical insurance.

Notice of rules and disciplinary actions related to rule violations will be distributed to each participant and his/her parents prior to the beginning of an interscholastic activity season.

Nondiscrimination

The district will not exclude any person from participation in the interscholastic program, deny any person the benefits of such a program or otherwise discriminate against any person in any interscholastic program on the basis of the categories identified in the district's Nondiscrimination policy.

The district will provide necessary funds for recreational and athletic activities for both sexes, although the aggregate expenditures are not required to be equal for members of each sex and expenditures for separate male and female teams are not required to be equal. Notwithstanding, the district will take an equity orientation in regard to athletics and activities; for example, in the case of boys and girls teams in the same sport, the district aims to create equitable funding for both. Further, the district will strive to create an equitable funding approach across all athletics and activities.

When individual students with disabilities are unable to participate in existing activities – even when offered reasonable modifications and necessary accommodations, aids or services – the district may offer opportunities for such students with disabilities to participate in separate or different recreational or athletic activities.

The district may operate or sponsor separate teams for members of all genders where selection for such teams is based upon competitive skill or the activity involved is a contact sport. However, when the district operates or sponsors a team in a particular sport for members of one gender but not the other, and athletic opportunities for members of the other gender have previously been limited, members of the excluded gender will be allowed to try out for the team offered, as WIAA policy allows. For the purposes of this policy, contact sports include boxing, wrestling, rugby, ice hockey, football, basketball and other sports in which the major activity involves bodily contact.

The district will provide equal athletic opportunities for all genders within each school for interscholastic, club or intramural athletics. In determining whether equal athletic opportunities for all genders are being provided, the district will consider the following factors:

1. Whether the selection of sports and levels of competition effectively accommodate the interests and abilities of members of all genders;
2. Provision of equipment and supplies;
3. Scheduling of games and practice time, including the use of playfields, courts, gyms and pools;
4. Travel and per diem allowances, if any;
5. Opportunity to receive coaching and academic tutoring;
6. Assignment and compensation of coaches, tutors, and game officials;
7. Provision of locker rooms and practice and competitive facilities;
8. Provision of medical and training facilities and services, including the availability of insurance;
9. Provision of housing and dining facilities and services, if any; and
10. Publicity and awards.

Annual athletic evaluation

The district will evaluate its intramural and interscholastic program in each school at least once each year to ensure that equal opportunities are available to members of all genders with respect to participation in interscholastic and/or intramural programs. The evaluation will include consideration for the factors listed in the above paragraph, Nondiscrimination.

Student athletic interest survey

Every three years, the district will administer to each school that operates interscholastic, intramural and other athletics the survey developed by the office of the superintendent of public instruction to determine gender-based interest in participation in specific sports. The district will consider the survey results when planning and developing recreational and athletic activities offered by the district and when determining whether equal opportunities are available to members of all genders.

Facilities

The district will provide facilities (e.g., showers, toilets, training rooms) for the interscholastic program in accordance with District Policy and Procedure 3211.

Athletic Code

The opportunity to participate in the interscholastic athletic program is a privilege granted to all students of the district. Participants in this voluntary program are expected to conform to specific conduct standards established by the principals and athletic coaches, as outlined in the Athletics and Activities Code and approved by the Superintendent or designee.

Appeal Process for Disciplinary Action

A student who is found by a staff member of the student's school to be in violation of any rules is subject to removal from the team. A student who has allegedly violated one or more of the conduct rules may appeal a disciplinary action as specified in the Athletics and Activities Code.

Coach's Duties:

Coaches are obligated to follow the rules and regulations established by the WIAA, district job description and other applicable policies and procedures.
